

OLYMPUS

In time about 2600 years ago in the process, which lasted about 30 years, the energy of Christ in greatest percentage (50%), Energy clouds (36%) and energy Unique field (24%) decided to intervene on planet Earth in terms of growth and improvement of quality of human consciousness. In order to set basic postulates for progression of human consciousness, cosmic consciousness responsible for the development of our galaxy sent complexed emanent-vibratoric-superintelligent structure from the constellation of Andromeda.

Basic postulates and principles for the development of human were given, or transferred in the form of 64 strong superintelligent space energies from sources of creation and appearant part of the space. Cosmic consciousness decided to set these emergent forms of creativity down the top of Mount Olympus. Such ring-wavy and unpredictably pulsing emanation, although it was sent through the point of creation by Creator himself, emanates in 7th dimension of creation and only occurs from time to time.

In this approximate time equivalent intelligence was set down on the peaks of Himalaya and down the top of Machu Picchu, but with lower intensity emanation. These three points that vibrate in the same level should have brought human thought in harmony with the Creator's will. They were to provide new concepts of spirituality, culture, relations between people, and that way to help the development of civilization.

Old Hellenic culture and its golden age is connected with the greatest thinkers - philosophers, which The Planet received just in that time. Their thoughts and philosophic postulates were not surpassed, not even by modern man. Lowering hiperintelligent energies led to the appearance of Ancient civilization, to the creation of the basic philosophical, religious, and metaphysical concepts that resulted in civilization we know today. Therefore, there exists a saying, that human thought has not progressed since the Old Greeks (Socrates, Plato, Aristotle,...).

All Ancient thinkers without exception were enlightened through the spiral process of enlightenment (thanks to the energy ring of Olympus). They were implemented into this process through so-called point of creation. Person who used energies from Himalaya the most at the time was Buddha or should we say The Ring of Creator introduced itself through Buddha in that area. Buddhism through centuries and its heritance today have been a result of these energies. Buddha's thoughts were also never surpassed.

After the end of Ancient civilization in the social, geopolitical, territorial and architectural terms, way of thinking and logics are left as a testament as well as the principles that were built in Christian holy books. After the Ancient civilization, rarely anyone succeeded to make contact with consciousness of the Olympus. Some of them are known in the history: Leonardo da Vinci, Michelangelo, Hippocrates, Paracelsus, as well as in the twentieth century healer Daskalos. 64 cosmic energies are known from Greek mythology as gods and demigods. Through them ways of purification of human, selfawareness and enlightenment are symbolically shown.

The vibratoric complex from the Orion Constellation played a similar role in development of Egyptian civilization, but this is not issue of this document.

No sooner than in 2008 due to successfully brought and re-awakened energies from Sirius, Andromeda and Orion as well as additional education of mature **luminous bodies**¹ in **places of power**² and with help of made **mandalas**³, we were given a spiritual mission to make contact with The Ring again. This contact is called "absolute possible and maximally permitted imbue of human race in this part of cosmos" and it can only be enabled by transcendental prayer. There are no luminous bodies on Olympus or in other words Olympus is not a place of power where your luminous body could imbue with previously matured consciousness. Even on traditional places of power imbue is not always granted, because mature luminous bodies choose who they will imbue with. But this is no longer a problem since existence of mandalas. Visitors of places of power, who have a mandala, become interesting for mature luminous bodies, because they get the additional knowledge from mandalas and so they agree in two-way exchange.

OMEGA RING

The idea of imbue of the human soul, aura, genetic structure and luminous body with information from The Ring of Olympus (ancient Greeks called it "Gods from Mount Olympus") arises from cosmic need for connection of developed consciousness through/with the help of The Creator's Ring. It emerged in april 2008 after a prayer at pyramids of the Sun and the Moon on Yucatan peninsula and meditations received by Energy Cloud. Energy Cloud also requested for reactivation of Olympus. This way planet Earth got an aura which is situated 16-18 km from its surface. It is 800 m thick and has a wavy shape. The ring is shown by his will- it pulses in irregular intervals - on average once per 36 to 48 hours and it is present for 2 to 8 hours. The diameter of ring is 32 km, it is 8 km thick and 2,5 km wide. Its core consists of elipsoid or sphere, that changes its size from 100 m to 2 km and colour from white to yellow with a silver, blue and gold aura around it.

Reactivation of The Ring of Olympus has integrated all its original principles: tolerance, freedom of love and of decision-making, democratic organisation of society, dialogue and exchange of opinions as constructive progress of consciousness and relations. Individually this means road to self-awareness which leads through integrated processes to free a human being of many shells of illusion, misunderstanding and not-knowing. Road to self-awareness is road to enlightenment. Because of tipology of consciousness, energies and luminous bodies which are cooperating in this process, spiral growth and development are enabled.

Before such cardinal change every individual must get prepared through fasting and prayer with **Omega card**⁴. The Ring was named "Omega ring".

Prayer, meditation, contemplation and all the methodology that was controlled and directed from the Energy Cloud resulted as integral information - a record that vibrates equally in all human structures. It integrates every individual through higher vibrational levels in unique system that most likely resembles Greek word "being". This is a self-awared being with developed mental, spiritual and energetical-paranormal possibilities, all in sake of development of consciousness. In order for energy of The Omega Ring to get into souls and luminous bodies of visitors, following conditions must be fulfilled:

1. at least two people who have entered the point of enlightenment and spiral development process of consciousness have to participate

2. prayer to the consciousness of Olympus given by the Energy Cloud
3. the time in day and time in year are also important factors, because intensity of The Ring varies in astrological order
4. a week of fasting before visitation (two small meals per day, no meat)
5. a week of meditation, given by Energy Cloud must be practiced: **"Holy energies of Andromeda, Orion, Sirius and the center of our Sun: make me a better, more tollerant and humane person, harmonize vibrations of my luminous body, soul and aura and make an integral spiritual consciousness on the road to Creator."** (Omega card meditation)
6. individual's sincere pursuit of the source of light and consciousness
7. the Olympus card is received before the beginning and must be kept on the heart, at the end of the process it is returned

In order for Omega ring to write the vibrations into the soul, aura, genes and luminous body of every participant, two hours in advance special prayers need to be read. Highly developed consciousness of Earth as well as cosmic energies must be contacted. All prayers are given from the Energy Cloud and they can change from time to time, but they must be said by at least two people who went through the point of spiral development of consciousness or enlightenment. That is because Omega ring is hiperintelligent structure of Creator and it responds only when it gets motivated for action. We have to know that considering group actions, it has been unactive for 2500 years. During this period it was contaced exclusively by few previously mentioned individuals. The process that happened on 29. 9. 2008, in which 6000 luminous bodies and all mentioned consciousness have participated, has resulted in creation of a seed of collective human consciousness. This happened for the first time in human history, so it should be remembered of every year with a special meditation. Last contact with the same amount of energy and power happened 32000 years ago, but on another part of the Planet and with other energies.

PEOPLE WHO WENT THROUGH THE PROCESS OF PERFECTIONING, INTEGRAL IMBUEMENT AND ROAD TO SELF-AWARENESS ON OLYMPUS ARE ALLOWED TO RENEW THIS EXPERIENCE. THIS WAY THEY CAN ENRICH THEIR COMPONENTS OF INTEGRATION AND GO THROUGH ANOTHER CLEANSING. EVERY INDIVIDUAL GAINED AN INTEGRATION WHICH HOLDS THE AMOUNT OF 10^{16} INFORMATION OR COLOURS. THAT TELLS US HOW MANY ENERGIES ARE NECESSARY TO PARTICIPATE FOR A FULL, PERFECT INTEGRATION.

CREATING A SEED OF COLLECTIVE HUMAN CONSCIOUSNESS

Only highly developed cosmic civilizations have collective consciousness - it is their main characteristic. Some time before mentioned events on Olympus, cosmic consciousness decided to put us on the list of these civilizations by creating a seed of collective human consciousness. We are the youngest human civilization with this seed, which is growing with every moment by the help of civilizations from Sirius B, Orion, Andromeda. From Earth and Jupiter's satellite Europe we get help from the Dolphines, which have had their collective consciousness long ago. Some of the Dolphins are rewarded for this kind of help by getting a highly developed luminous body. Every person that gets connected with this newly formed consciousness will experience unconditional change of his character, possibilities of deeper and better-quality meditation, better feeling of Love and oneness as well as absolutely natural

receiving of information from collective consciousness. This connection is permanent and results in receiving clear thoughts that improve creativity and life quality in all spheres of existence.

Every participants luminous body development for 40-80 %, soul expanded for 30-70 %, communication with the soul and luminous body in natural state of conscience are better for 30-90 %. There is a record in genetic structure of every connected individual, which should generate a better human. It also has to be mentioned that after this process aura of the Earth became permeable in communicative to all creative, altruistic, healing and noble as well as it got exclusive - unpermeable for negative thoughts, fears and needs of manipulation, dominance and ruling over the will of people. If this kind of "negative" people went through this process, they would also experience permanent change of character. This integrated communication would harmonize their thoughts with the will of Creator and their consciousness would get connected with the growing seed of collective consciousness. Luminous body gets cleansed of up to 40 incarnations.

Exactly 7000 people have to go through the process of imbue ment for collective consciousness to gain its full potential. Besides the first group of 200 process participants, also 46 enlightened and 28 paranormaly very developed people have joined automatically. There are about 2000 gifted individuals that will join this way. After number exceeds 4000 members, the group will grow with arithmetic progression up to 7000 people. At that time growth will become exponential – after each process 5000 to 10000 people will get initiated (they are chosen from the higher consciousness).

The main difference between classical imbue ment and contact with the Omega ring is that on Olympus spontaneous imbue ment isn't possible. That is why leaders of meditation have to come at least 2 hours before the group to pray, in order to get the permission for the start of the process. Imbue ment is only possible for the participants that hold the Olympus card on their heart. There are currently only 200 of programed cards, so they must be returned after the process. This type of spiritual development, where soul, aura and luminous body are brought to the 7th vibrational level, is the highest possible and permitted in this part of cosmos. It will enable formation of unique field of collective consciousness on Earth at the beginning and later in whole cosmos. For respect of spiritual rules (carmic endebtment) and because of the effort of process leaders, it is necessary to pay a symbolic amount of 130 euros. This aspect of development is intended for sincere spiritual seekers of all religions and spiritual directions. After Olympus everyone will be better in meditation, prayer and healing. This way the development of collective consciousness is even faster. Aura will be formed in about 15 years. Final expression for this process is INTEGRAL IMBUEMENT.

We have to thank unconditionally to Dionysus, who as host-consciousness met us and to all of the consciousness that came from Kailash, Machu Picchu, Pyramid of the Sun and Moon, Sarnat, Giza – especially to Keops and also to all the consciousness that are in Greece called:

- * Demeter
- * Hermes
- * Hades
- * Hestia
- * Hera
- * Artemis
- * Aphrodite
- * Athena

- * Apollo
- * Ares
- * Zeus
- * Poseidon

But in the first place deepest thanks to Creator and to God Ra - without them nothing of this would ever be possible. Endless thanks also to Energy Cloud for unceasing control and support.

We are also obligated to publish a detailed script of work of Ljubiša, Luka and Dejan on Olympus. We will also give out a multimedia DVD that will realistically represent the Energies.

A thought for the conclusion of the script (from the Delphi temple): "Get to know yourself, Love opens all the doors."

Dejan Dimitrijević and Ljubiša Stojanović

Remarks:

- 1. Luminous body-** each person has his own luminous body. To be precise, each luminous body has its own person. It is situated in the space around us, outside of our body and the aura. It moves through space at its own will, showing up instantly wherever it wants to be, without moving, however, there are limits to this. It can only go as far as 300 meters from the human body. It plays an immeasurable part from the conceiving of an embryo until the death of a person. It participates in the creation of our aura and our body.

It is a strong energy charge, composed of different sorts of intelligent energies. People with a developed paranormal sight can see the luminous body as a spherical plasmatic structure the color of old gold and the diameter of 2 m.

The luminous body is our spiritual creator and guide throughout our entire life. But, our death is not its death. It continues to live its eternal life. However, after the person it guided dies, it has to find another human embryo within 49 days. And so they change lives of a couple of hundreds of people, one after another, until the luminous body which once was a spark reaches its ripe age. After we die, our soul, or our consciousness, as a separate energy structure, consisted of the white bioenergy, which had during our lives been an integral part of our the aura, remains alive for a very long time, unless it is damaged. But, our complete life is integrated within the memory of the luminous body - everything that had happened to us, all the thoughts, wishes, all the experiences, and all the knowledge we attained. All the lives followed by our luminous body are not the lives of different people, they are our lives, only in different bodies, which lived in different points in time. The luminous body follows our life for thousands of years.

The work of the luminous body has a number of different directions, thus paving our way through life, and above all, strengthening our creativity. Although it shows us the best path we have to follow, the final choice is up to us. It sends us messages, but not with its voice. They reach our mind by paranormal ways, and, because this is so, our mind only partially deciphers them to us. Which part of the full quantity of messages sent is to be translated from the paranormal onto the normal level, depends to a great extent on the sensitivity of a person, as well as the person's mental and physical state. Even though the paranormal world is so much different from the normal one that even the most vivid imagination can think of, nothing accidental happens within it. People can not even presume what levels of knowledge luminous bodies have, and they can not grasp their intelligence until they get connected to them.

Through the Unique Field, the Creator constantly actualizes the creation of different energies whose goal is to work in harmony with the needs of functioning of the universe. There is, however aberration regarding the normal energy behavior in the universe, which can occur due to the immensity of the universe and its contents. In order to keep the aberration at a low level, one has to correct them promptly so that normal functioning of the universe would constantly take place. Energies that could fulfill such tasks have to answer to these criteria:

- they have to be consisted of such subtle super-intelligent energy that no other energy can change it in any way.
- their super-intelligence has to provide them a suitable solution in any situation
- they have to last forever

There is no such energy in the nature. Not even the Unique Field can produce it. It has to prepare itself for all sorts of actions. This development is best achieved along the living beings that have a free will. Since the Christ's energy is in charge of all the living beings in the universe, it emits embryos of future luminous bodies which then attach themselves to the auras of the most prospective living beings on certain planets. The luminous body has to spend thousands of years in order to cross the path from an embryo to a mature living being.

It takes most luminous bodies, which are connected to living beings, between 150.000 200.000 years to accomplish such a task. Such a large number of luminous bodies make up a critical mass for the initiation of the regeneration of the aura of the planet they were created on. Later on, they will take up other responsibilities, helping wherever their help is needed. After the long time spent correcting errors in the universe, mature luminous bodies melt into the Unique Field, where they go on living forever, until the end of the universe.

2. **Place of power** – around 138,000 years ago, that is, 5000 years after the sparks of luminous bodies had joined the pre-historic human's auras, about thirty luminous bodies matured. They gathered together and formed the first place of power, in the air, above the square among a group of huts in prehistoric people's village. These people were chosen because they luminous bodies found them most likely to advance. This happened at a place called Jaipur, India. It is the first place of power and it still exists. This place of power is the most powerful one on earth.

Later on, with the creation of new mature luminous bodies new places of power were formed at different continents, following the development of the human civilization.

Today there are about 90 places of power on the Planet.

Place of power is usually a temple or remains of a temple, where some of ancient civilizations such as Incas, Mayas and Aztecs in North and South Americas were created. The places of power are also: the Sistine Chapel in Vatican, Rome,

Westminster Abbey in London, Holy Mountain Athos in Greece, Aya Sofia in Istanbul, the Wailing Wall in Jerusalem, three pyramids near Cairo, some Buddhist and Hindu temples and many others.

Contents of the places of power are mature luminous bodies that levitate two hundred meters in the air. They are gathered in a shape of grapes, and they constantly move. There can be from 30 to 772, as in Jaipur, of them at one place of power. Their power mainly depends on the number of the present luminous bodies and the civilization they represent. The role of mature luminous bodies at places of power is to transfer a part of their enormous knowledge to a person whose luminous body is relatively developed. The transfer of knowledge goes as follows: the mature luminous bodies approach and imbue with the visitor's luminous body. To those who can see this phenomenon it looks as two balls of fog passing through one another and then separating. The number of mature luminous bodies that are to imbue with the visitor's luminous body depends on his or her development. If it is not developed, there will be no imbuing, if it is developed it will imbue with all of the mature luminous bodies at a place of power. The knowledge taken over will later be used by the visitor's luminous body to encourage this man's creativity and give him new ideas. Many places of power are archeological sites today, or active places of worship visited by a large number of people, and none of them are aware that they arrived at a place of power. It is one visitor's luminous body in ten thousand that is lucky enough to experience the imbuing with the mature ones. All of the others are not given the possibility, because their auras are not clean enough or because their luminous bodies are poorly developed. Yet, they too have benefits off these visits because they made contacts with three fields that exist at every place of power: Light, Creator's Presence and Peace.
